

MACKIE LAUNCHES EXCLUSIVE-FOR-INSTALL PASSIVE LOUDSPEAKER SERIES

New passive speaker line from Mackie claims to address needs of rental companies and clients alike

Mackie has introduced an all-new loudspeaker line specifically designed for installs seeking rich, articulate full-bandwidth response in a sleek compact design – iP Series Install Performance Loudspeakers.

“We are extremely excited to deliver a professional Mackie solution for the install market,” commented John Boudreau, SVP Product Marketing. “iP speakers deliver stunning performance and have a clean look perfect for even the most aesthetically-demanding venues.”

The series includes three full-range models (10”, 12” and 15”) and a companion 18” subwoofer. The fullrange iP-10, iP-12 and iP-15 feature 8 x M10 rigging points and a rotatable 90°x50° horn to support both vertical and horizontal rigging. A rotatable centre logo allows for clean presentation in all configurations.

Sonically, premium components include high-output, custom-designed woofers with large

voice coils to handle more power for maximum output and premium 1.4” titanium diaphragm compression drivers for smooth, consistent high-frequency response. Plus, convenient features like a choice of either Neutrik or terminal connections can simplify an install, saving time and cost. A selection of mounting accessories delivers

additional placement flexibility. Available are both a ceiling and wall-mount bracket to meet the needs of nearly any install application. The optional SP260 2x6 Speaker Processor features pre-sets specifically for iP loudspeaker for quick setup and flawless sonic performance.

“With the demanding needs of install applications, each and every detail is important,” remarked Boudreau. “From horizontal and vertical hangs, to low-profile wall and ceiling mount accessories plus a rotatable logo that presents well in any orientation, iP series is the perfect solution when the client is focused on the perfect aesthetic.”

An affordable install solution, Mackie iP Series loudspeakers meet the needs of a wide range of install applications including Houses-of-Worship, theatres, auditoriums, casinos, clubs and karaoke rooms.

The new iP Series Install Performance Loudspeakers are available for order now. Available accessories include the Mackie PA-A2 eyebolt kit, iP-CM100 ceiling mount and iP-WM100 wall mount.

STUDIOMASTER PROFESSIONAL LAUNCHES 8-CHANNEL CONFERENCE MIXER

Studiomaster Professional is aggressively committed to bring world-class products to the install market in India. The Indian pro audio brand recently launched the VāK 20 - an intuitive 8 channel conference mixer. It is a unique dedicated conference mixer that allows the usage of any standard microphone and other line inputs to be connected into a conference set-up. After the success of the VāK 10 conference system and the Auto 4 automatic mixer, Studiomaster Professional aims to fill the void of a stellar conference mixing solutions with the VāK 20.

The VāK 20 conference mixer features 8 versatile XLR-Jack combo Mic-Line inputs along with signal/clip indicator & active LED on each channel. The combo XLR-Jack input allows ultimate flexibility. The input section also features dip switches for Mic/Line selectivity and also individual +48V DC phantom power supply selectivity. Each channel of the VāK 20 features a unique Chairman/Delegate selectivity switch.

Like most auto-mixers the Chairman channel automatically attenuates the

delegate inputs. This allows for seamless discussions using the VāK 20 conference system.

The output section features a huge list of convenient and functional attributes. It features a balanced XLR master output with provisions for a master limiter. The processing on the master output ensures clarity and improved legibility. The VāK 20 boasts of infinite daisy chain connectivity between units. The VāK 20 from Studiomaster Professional also incorporates an intuitive logic out connector that can be used to control cameras or speakers.

The master section of VāK 20 has abundance of features such as Level Control, easy LF / HF cut switches and tri-color &

LED bar-graph for monitoring. Apart from this, the master section features unique and easy ambient noise compensation modes such as Noisy, Normal, and Quiet mode. This allows easily operability even in demanding situations. The VāK 20 allows 6 NOMs (number of open microphones) in the set up. This is clubbed with powerful NOM-based gain attenuation for added seamless operation. The VāK 20 is housed in sleek 1U 19” rack mountable unit with rack ears.

With the Vak 20 Studiomaster Professional conference mixer is very easy to setup and operate. With a plethora of features the VāK 20 is sure to find it its place in conferences rooms, board rooms and educational institutions to name a few.
